

BlueBlink Optical Oxygen sensors

Multipurpose optical non-invasive sensors

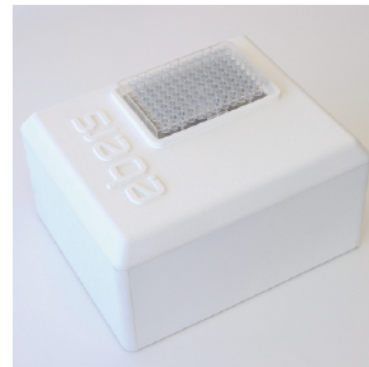

Features

- Biocompatible
- It does not affect to the concentration of O₂ in the measured medium
- Spots supplied in sterile ready-to-use conditions
- Suitable for gas and liquid media
- Easy-to-use intuitive software

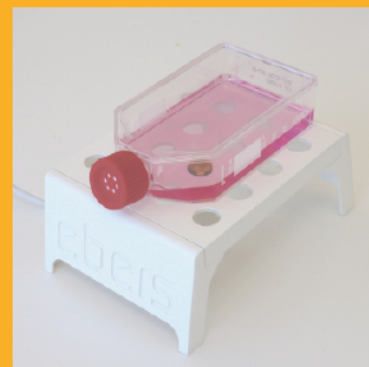

Applications

- Suitable for almost any kind of transparent vessel:
 - Reservoirs
 - Cell culture flasks
 - Multiwell culture plates
 - Dishes, etc.

Benefits

- Plug-and-play measuring tool
- Inexpensive
- Scalable system: up to ten sensors with the same electronics
- Easy and fast connections without the need of optical fibers

Look into any transparent vessel!
